Metal Drum Top Opening Tools for Canseal Closures

A set of two press tools “Stage-one” and “Stage-two” supplied by Technocraft are to be used to make the opening for Canseal closures in the sheet metal drum top. These tools are supplied by Technocraft and can be loaded on a power press. There are adjustable stoppers in “Stage-one” press tool, which are to be set to position the opening for Technocraft Canseal closure drum top. Pressure pad and stripper shall be supplied to suit the cross sectional geometry of the users drum top.

“Stage-one” press tool is a combination tool and performs piercing and forming operation.

“Stage-two” press tool does the curling operation.

Crimping Tools for Canseal Closures

Either a manual or a pneumatic crimping tool is to be used to fix the canseal closure on a drum top. These crimping tools supplied by Technocraft are common for metal drum tops and plastic drum top

MANUAL CRIMPING TOOL

PNEUMATIC CRIMPING TOOL
